

GEMLOUPE-4X

FINGERPRINT MAGNIFIER

It checks for the presence of fingerprints on the material, analyzes the characteristics of those fingerprints, if any, and provides a person match.

TECHNICAL SPECIFICATIONS

- Metal column on a circular base with a tooth diameter of 75 ± 5 mm on the floor, fixed with a screw that can be opened with an allen key in such a way that it does not rotate to the right-left and front-back, and provides the up-down movement of the lens section by placing the lens section on it.
- 88 + 5mm long column.
- Diameter of the lens section, inside to inside 4cm, height 4cm
- Lens to magnify the examined fingerprint by at least 4x

GENERAL SPECIFICATIONS

- Robust aluminium body to harsh conditions
- Electrostatic coating
- Adjustable locking mechanism
- Double lens design

ACCESSORIES

- Papil counting comb
- Allen key
